About Science

Grades 5–9 5–12 Minutes/26 Lessons 500

This series actively engages students in the process of scientific inquiry. Each lesson focuses on a single concept, providing a body of knowledge that is manageable for both teacher and student. The viewer sees only the hands of the person performing the laboratory experiment, while an off-camera narrator explains what is taking place. (© 1990)

Algebra: In Simplest Terms

Grades 9–12 29 Minutes/26 Lessons 512 **[CC]**

This series not only clarifies the elusive problem-solving concepts of algebra, it also shows why they are important. Using simple explanations and helpful illustrative computer graphics, host Sol Garfunkel walks befuddled students through realistic problems, highlighting the common trouble spots. The series also demonstrates why algebra is indispensable in retail, biology and other professions—even in such an ordinary activity as driving a car. (© 1991)

All Rendered Truth (A.R.T.)

Grades 5–12 57 Minutes/1 Lesson 745 **SL NEW**

This program highlights the work of 21 artists working throughout the southeastern United States. Using a variety of media and demonstrating a range of creative approaches, these interesting individuals are self-taught artists, often referred to as visionary or folk artists. The program was developed by the Folk Artists Foundation, which has roots in our state. (© 2008)

Rights: Unlimited

Almost Painless Guide to American Civics SL [CC]

Grades 5–12 19-22 Minutes/5 Lessons 973

Students will identify with the energetic and entertaining style of this series, which utilizes contemporary and archival video footage to offer a fresh approach to civic study. This series examines the Constitution, as well as the specific responsibilities and functions of the executive, legislative and judicial branches of our government. Also covered are the interaction of the three branches, the distribution of power, checks and balances, the election process, the constitutional origins of the United States government, the Bill of Rights, and the amendments. (© 1998)

Rights: Unlimited broadcast/off-air record (no tape duplication)

America's Early Years, 1789-1816 SL [CC]

Grades 5–12 15 Minutes/5 Lessons 973.04

Through this series, students examine the important process that established our federal government. The impact of the Louisiana Purchase and Lewis and Clark's expedition were major events affecting the territory of the United States during this period. From Washington's presidency through the terms of James Madison, an in-depth historical study is presented in this series. Delving into the history of slavery and Southern plantation life, students view their impact on our nation. The experiences of the Industrial Revolution and the development of major inventions involve the students in the significance of the events of our past. Concluding with the War of 1812, the impact of this period in history is examined. (© 2003)

America's Quest for Freedom

Grades 5–12 15-19 Minutes/9 Lessons 973

The main story of America is its quest for freedom for all. This *Reader's Digest*-produced series looks at our history through that lens. While it celebrates our dedication to this human ideal, it also realistically shows that events which increased freedom for some groups were usually accompanied by forces suppressing liberty for others. This clear focus on America's essential struggle memorably dramatizes our common history. (© 2003)

America's Veterans [CC]

Grades 2–8 24 Minutes/1 Lesson 320

This program explores several critical dimensions of the question, "What does Veteran's Day mean to you?" It addresses how and why we honor veterans, what we can learn from the lives of veterans and the rights and responsibilities of citizenship. The program complements and enriches the treatment of Veteran's Day found in most American history textbooks. In addition, it contributes substantially to students' attainment of the Roles of the Citizen in American Democracy standard of the National Standards for Civics and Government. (© 2000)

American Civil War, The SL [CC]
 Grades 5–12 28–38 Minutes/4 Lessons 973.7

These lessons explain how the North and South differed economically, socially and politically. The depth and magnitude of the American Civil War is explored from the vantage points of the North and the South. Students will evaluate the resources of both; understand the major military strategies of the war; and experience the turmoil of life during this period, as well as triumph with the Emancipation Proclamation. Students will obtain a better understanding of the perspectives of the North and the South and why the Civil War occurred. (© 1996)

Ask Mark Question **SL [CC]**
 Grades K–2 2 Minutes/2 Lessons 372.35

Loveable animated character Mark Question from Letter TV has his own show about science phenomena. These lessons explain evaporation and the water cycle and how machines make work easier. (© 2005)

Rights: Unlimited

Lesson Title	Cat. No.	Length
1. Evaporation/Water Cycle	0168-0001	2:00
2. Work/Simples Machines	0168-0002	2:00

Atoms & Molecules
 Grades 4–6 13–15 Minutes/5 Lessons 539

This physical science series uses computer-generated graphics, animation, models, and demonstrations to explain how atoms form molecules, the building blocks of matter. Emphasis is placed on how physical and chemical changes occur to create new substances and how molecules build up and break down in the process. Radioactivity and nuclear fission/fusion are explained. (© 1993)

Rights: Unlimited

Lesson Title	Cat. No.	Length
1. The Behavior of Matter	0135-0001	14:42
2. Evidence for the Atomic-Molecular Theory	0135-0002	14:50
3. Explaining Matter: Chemical Change	0135-0003	12:26
4. Atomic Energy: Inside the Atom	0135-0004	13:11
5. Learning About Nuclear Energy	0135-0005	14:22

Atoms of Fire
 Grades 10–12 15 Minutes/7 Lessons 547

This series provides an easy to understand basic introduction to modern organic chemistry through demonstrations, graphics and documentaries. It shows what this means for us today in terms of food, clothing, preservatives, solvents, medicines, and life itself. (© 2003)

Rights: Unlimited broadcast/off-air record (no tape duplication)

Lesson Title	Cat. No.	Length
1. The Organic Mystery	2184-0001	14:49
2. A Taste of Hydrocarbons	2184-0002	14:36
3. In A Bit of Bonding	2184-0003	14:40
4. Improving on Nature	2184-0004	14:25
5. Polymers and Plastics	2184-0005	14:51

Basics of Physics **SL**
 Grades 6–8 19–41 Minutes/6 Lessons 530

This series explores the significance of physics in the world around us. The basics of sound and vibration are examined along with how our ears work. The exploration of light, color and how our eyes work are studied in one lesson. Our dependency on reflected light is examined, as well as a comparison of the speed of sound and light. Potential and kinetic energy is introduced in addition to the main forms of energy – mechanical, heat, chemical, radiant, electrical, sound, and nuclear. Through the lesson on exploring heat, problems and issues associated with our dependence on nonrenewable resources are addressed. Newton's Laws of Motion are presented with an explanation of how a rocket blasts into space. These six lessons are packed with informative explanations of the basic laws of physics. (© 2004)

Biology Of..., The [CC]*
 Grades 7–12 15–30 Minutes/16 Lessons 500

A high-quality visual resource for biological education, this revised series provides a comprehensive introduction to the evolution and diversity of living things. All the lessons previously listed in the resources book have been remade using new techniques of microscopy, animation and photography to reveal more about structure, process and behavior of living things. Go to the ITV Web site to download the free content guide that contains detailed descriptions of each lesson. All are closed-captioned except those indicated by an asterisk. (© 2001)

Biology: The Science of Life SL [CC]
 Grades 5–12 15–16 Minutes/12 Lessons 574

Get your students off to a good start as they learn that the science of biology is the study of life. The characteristics for classifying living things into one of five basic kingdoms are presented. The role of non-living, abiotic factors such as water, air, soil, heat, and light are examined demonstrating their impact on ecosystems. Students view how organisms interact with ecosystems. A single drop of water is examined for bacteria, Protists, microscopic animals, and fungi visible only by a microscope. The series offers a survey of the major phyla of the kingdoms Animalia from the simplest sponges to the most complex vertebrates. An overview of the phyla of the kingdom Plantae is explored with special emphasis placed on the importance of photosynthesis. The Kingdom of Fungi is investigated examining specimens of mushrooms, molds, yeasts, mildews, and lichens. The important role of decomposition is explored. The structure of the living cell is defined as the simplest structure that can carry out all of the activities characteristic of life. The key processes employed in reproducing living organisms and their cells are studied. Asexual and sexual reproduction is explained. The process of mitosis and meiosis are presented. Students learn how genetic mutations occur in DNA as they study the master molecule of life. (© 2001)

Character Minutes

Grades 1–12 1 Minute/28 Lessons **SL * [CC]**
370

This series focuses on positive character traits, such as work ethic, perseverance, fortitude, and the ability to work as part of a team. Each program features a prominent person in the community, including Charles Duke and Charles Bolden, astronauts; Jack Leggett, baseball coach at Clemson University; Patti Just, former anchor at WJWJ-TV; and Charles Austin, former chief of police in Columbia. The short, concise programs, each exactly one minute in duration, contain valuable content that could be used in a weekly school news program,

as a writing activity in a language arts class, or as a discussion topic. Individual lesson titles are listed for your information; however, there is only one catalog number. *Some titles are available in *StreamlineSC*. (© 2000)

Club Write SL [CC]
 Grades 4–6 15 Minutes/14 Lessons 411

This series serves as a comprehensive contextualized support for developing writing skills in preparation for high school. Episodes can be used within and across curriculum areas to support many different applications of writing, from lyrics to persuasion to technical reports. In each program, students are challenged to approach a writing assignment in different ways. Strategies for organizing information and structuring personal schedules to complete assignments are depicted. Real-life settings where different writing styles are employed are carefully woven into the stories. Cooperative learning is emphasized. The new CLUB WRITE KIDS is a prequel to this series. (© 1999)

Club Write Kids SL [CC]
 Grades 4–5 15 Minutes/12 Lessons 411

In this prequel to Club Write, we meet a whole new group of young writers who learn to celebrate the sheer joy of writing. Cassie is the central character whose adventures explore the very basics of written communication—parts of speech, capitalization, punctuation, appropriate use of modifiers, as well as sentence and paragraph construction. In each episode, Cassie and her friends showcase different strategies for organizing and starting on a writing project. (© 2002)

Colonial Williamsburg REV
Electronic Field Trips, The
 Grades 4–8 58 Minutes/7 Lessons 973

Colonial Williamsburg offers these live, interactive field trips to 18th-century colonial America. Carefully planned and historically accurate, these trips are educational adventures that combine live broadcasts and computer on-line technologies with comprehensive classroom lesson plans and resource information. Schools can view these programs free of charge, but need to register and pay a small fee to receive curriculum materials and on-line interaction. Schools may tape programs and use them within 10 days from the date of broadcast. The tape must be erased within 45 days. Schools that have received a scholarship for this program, or that have registered and paid to participate, may tape the program(s) and keep the tape(s) for the life of the tape. The *ITV Update* will provide more information about these field trips. New titles for 2009–10 are announced below. (© 2009-2010)

To register, go to <http://www.history.org/trips>; phone 800-761-8331; or fax 757-565-8916.

Rights: Limited broadcast/off-air-record (no tape duplication)

Common Issues in World Regions [CC]
 Grades 6–9 27–29 Minutes/8 Lessons 910

Designed to help students see through the eyes of their peers how issues that affect them also affect others, this series aids in increasing the understanding that all students have of each other at a time when Western Europe is changing rapidly. The lessons present issues of contemporary concern—suburbanization, rural isolation, environmental degradation, immigration—and incorporate one of the five fundamental geographic themes (region, location, place, movement, and human/environmental interaction). (© 1991)

Concepts in Nature SL
 Grades 2–6 15 Minutes/8 Lessons 574.4

This series provides a fascinating look at the behavior of wild animals as they interact with each other and their environment. Viewers learn that animals have specific and unique living situations, diets and actions. Incredible wildlife photography illustrates the relationships between predators and prey; animals and the seasons; and survival skills and instincts. Students learn of the complex cycle that governs all living things and the ways in which both animals and humans play a role in maintaining this delicate balance. (© 1997)

Deskercise [CC]
 Grades K–5 10 Minutes/185 Lessons 372.86

This series is designed for daily use in elementary classrooms and consists of 185 interactive exercise episodes, built around 37 weekly themes. There are five 10-minute lessons in each theme so educators can use one each day. Each interesting lesson includes a warm-up and cool-down segment along with the more robust theme based activity segment and features animation combined with live action. Themes include Red Ribbon Week, National Hand-washing Awareness Week, Martin Luther King Day, National Nutrition Month, National Library Week, Earth Day, and Flag Day. Slim Goodbody is the host of the attention-keeping programs that provide pertinent information, even a brief geography lesson, while encouraging physical activity appropriate for young students to do while standing by their desks. The series was developed in cooperation with the American Association for Health Education (AAHE). (© 2005)

[CC]

Grades 10–12 28 Minutes/52 Lessons

460

A public television series and a two-semester television course, this series follows the travels of Raquel Rodriguez, a lawyer from Southern California, as she embarks on a journey to aid an ailing patriarch. This serial drama introduces the basic structures, language functions and vocabulary groups of Spanish. Early episodes use both Spanish and English narration, but by episode 13, students hear only Spanish. (© 1992–1997)

Discovering Ancient Greece

SL [CC]

Grades 6–12 35 Minutes/1 Lesson

938

Taking students on a voyage into a long lost world, this lesson explores the ancient civilization of Greece from the traditions of its people to the architecture of its great cities. Students visit Mycenae, the ruins of the once great city-state Corinth, and the great theater and center of medicine at Epidaurus. They are able to explore Olympia, Delphi and finally visit Athens, the birthplace of democracy. The end of the program examines the conquests of Alexander the Great and the Roman occupation of Greece. (© 1995)

Different and the Same

[CC]

Grades 1–3 13–15 Minutes/9 Lessons

305

Using animal puppets of no specific race or ethnicity, this series focuses on children's experiences, feelings and concerns while providing pro-social, positive models for coping with prejudice. Generally set in school locations, stories involve prejudice and feature at least one adult character—usually a school figure—to help children resolve difficult situations without dictating solutions. As a real person with a specific race or ethnicity, the adult reflects on personal life experiences while talking with the puppets. (© 2001–2003)

NOTE: Teachers utilizing this series for the first time must preview the lessons because many deal with sensitive topics that require planning prior to viewing by students.

Environmental Minutes SL [CC]
 Grades 3–8 1 Minute/28 Lessons 628.168

This series produced by ITV and ETV with the SC Department of Health and Environmental Services focuses on environmental education in short, concise minute programs that schools can use in locally produced school news programs or as part of science lessons. The programs provide student awareness and promote good habits, including recycling. Topics include oil leaks, greenhouse effect, renewable resources, packaging, and styrofoam. Individual lesson titles are listed for your information; There is only one catalog number. (© 2000)

Environmental Weekly

Grades 4–12 25–30 Minutes/20 Lessons 631.4

These programs, which are organized into four modules, are designed to enhance the scientific/environmental literacy of students rather than to replace the typical school science class. By noting components and relationships, the series explores the environmental aspects of science to help students identify and explain systems (e.g., the water cycle, our atmosphere, the energy cycle, and the waste cycle). This resource helps students use the concepts of systems to organize seemingly isolated facts and observations into comprehensible explanations of how things work. The goal is to enhance learners to then use conceptual, physical and mathematical models as simplified representations to help explain and explore how things work or might work. (© 1998)

Events of the 20th Century

Grades 7–12 15 Minutes/8 Lessons Various

From the horror of the Holocaust to the triumph of the Apollo XI moon landing, this series provides insight into the major historical events of the 20th century. Each program blends archival footage and interviews to provide students with a unique look at the momentous occurrences of the period. Through these programs, valuable lessons are taught and images are burned into memory, making these titles ones that students will never forget. (© 1998)

Eye Wonder

Grades 4–9 27 Minutes/23 Lessons

SL [CC]
530

Produced by ITV in conjunction with ETV, this Telly Award-winning and Regional Emmy-nominated series explores relevant science topics, integrating technology and focusing on varying career clusters. Using South Carolina science standards, which are based on national science standards, the series excites students with interesting facts and just plain fun! It looks at the science around us through the eyes of the cameraman. Through his zany, off-the-wall, wacky wit, students learn about fascinating wonders—from how doughnuts are made to why tennis balls are designed the way they are, and much more. Students can suggest topics for future programs by e-mailing eyewonder@sctev.org. The program's Web site contains teacher guides with standards in addition to creative student activities: www.eyewonder.org. (© 2003–2006)

February One

Grades 6–12 58 Minutes/1 Lesson

SL [CC]
305

FEBRUARY ONE is a special documentary that tells the story of the Greensboro Four - the men who participated in an historic event in Greensboro, North Carolina, that helped close the door on segregation. Featuring dramatic reenactments, rare historical footage and first hand accounts of the event, February One documents one volatile winter in Greensboro. The events not only challenged public accommodation customs and laws in North Carolina, but served as a blue print for the wave of non-violent civil rights protests that swept the South and the nation in the 1960's. This program is excellent, presenting the history in a format that invites and keeps interest. (© 2004)

First Step auf deutsch SL
 Grades 1–5 15 Minutes/10 Lessons 430

Produced by ITV with ETV, this course is designed to meet the needs of schools that would like to offer foreign languages but have no language teacher and serves as an introductory-level course in German. Since language instruction is offered in a manner consistent with the recommendations of the South Carolina Foreign Languages Framework, all lessons present many German words, with emphasis on the spoken word rather than the written word. First Step auf deutsch AGAIN SL
 Grades 1–5 8–14 Minutes/10 Lessons 430

Produced by ITV with ETV, the First Step...AGAIN lessons are designed as follow-up lessons to those in the First Step series. Each lesson reviews the vocabulary presented in the corresponding First Step lesson. The direct-teaching method is utilized, with a foreign language teacher in the studio. Songs and visual segments from the First Step lessons are revisited and the teacher provides an opportunity for students to listen and repeat words in context. (© 1999)

Geography in U.S. History

Grades 9–12 19–20 Minutes/10 Lessons **[CC]** 973

This series contributes substantially to citizenship education by considering the interrelated content of geography and history.

Each lesson focuses not only on a major period of American history and a significant event, but also on related developments within that period. Each lesson incorporates the most recent thinking about the teaching and learning of geography, and reinforces current efforts to help students understand the investigative and analytical aspects of this subject. Great Campaigns of the Civil War

Grades 6–12 30 Minutes/4 Lessons 973.7

Using realistic reenactments of the pivotal battles of the Civil War, this series humanizes the struggle through the use of portraits and readings from letters, speeches, and diaries. Period photographs, music, maps, and paintings interweave with sound effects, videotape footage of troop engagements and a tightly written script to chronicle each major battle and its impact on the overall direction of the war. Information about the major personalities of the time—and their lives after the war—as well as the day-to-day life of the ordinary foot soldier, gives a feeling for how the tragic conflict touched lives. (© 1998)

Rights: Unlimited broadcast/off-air record (no tape duplication)
