

Digital Education Services Contacts

The former Distance Education Learning Center facilities or DELC have been modernized and now called **Digital Education Services (DES)**. Your facilities have been upgraded to include live and archived video streaming capabilities. The new delivery includes OnePlaceSC, and your DES contact can assist you implementing the resources you need to facilitate learning. Like the DELC, DES are equipped by ETV and operated by local school districts to provide ITV and other educational resources into their schools. These services can offer customized broadcast streaming schedules, dubbing services, marketing, training, and loading servers with local content. To learn more on how the DES can assist you, go to <http://www.sctv.org/education/des/>.
