

District **Digital Education Service (DES)** facilities are being transitioned from broadcast, EBS and cable delivery to streaming video. We are expanding the Video-on-Demand presently offered by **ETV StreamlineSC** to include live programming and local school productions. The new delivery includes <http://OnePlaceSC.org>, and your **DES** contact can assist you implementing the resources you need to facilitate learning. This year the old DELC systems that had 4 channels will be reduced to one. How you view the DES channel, as well as all the ITV and ETV channels, depends on your district's status of implementing the new streaming technology; however, many will continue to utilize their existing Broadcast Distribution Systems. No matter what technology your district is using today, the DES operators in your district (<http://www.scetv.org/education/des>) can offer customized schedules, recordings, marketing of programs, training, and the ability to insert your local content into the system.
