The Economics Classroom course is designed around Annenberg/CPB Professional Development Workshops. Providing a solid foundation for teaching concepts in high school economics courses, this self paced course focuses on a range of topics from personal finance to global economic theories. In addition to defining economics concepts and outlining modern economic theory, the video lessons review the national standards for economics education and provide effective lesson plans and classroom strategies.

All class meetings will take place through distance learning. The instructor and participants will communicate via Moodle — the course platform on the Internet. Assignments and discussion forums will be facilitated in Moodle.
